

Report of working group 10 activities, September 1985.

=====

During the past year, activities of working group 10 were initiated. This took more time than anticipated, but fortunately during MIE 1985 in Helsinki, a working group 10 meeting good be organized. As a preparation to this meeting literature was collected amongst potential members and globally classified.

In the Helsinki meeting it was agreed that the working group should work towards a book to be set up in the framework of a workingconference. The preparations of this workingconference will be a considerable effort. It was agreed to distribute a draft table of contents amongst the members and to refine that based on reactions of the members. It is expected that the table of contents will be ready by the end of this year. The location of the workingconference and sponsorship will need more consideration. The working group has in mind to organize the working conference in autumn 1987 or spring 1988.

The membership does not cover all membercountries of IMIA. It was suggested to stimulate additional members from countries not yet present. Perhaps the point of attention for the annual general meeting (a list of members is supplied as an annex to this report).

During the Helsinki meeting Mrs Marion Ball was appointed as a secretary.
