

Rules for use of IMIA and other logo's.

Use of IMIA logo.

The IMIA logo can be used on all internal and official IMIA documents. The logo can also be used by all IMIA Special Interest groups and Working groups on their stationary, meeting and conference material.

Member countries can use the IMIA logo on their official documents with the text "Member of IMIA", together with their own logo.

Regional members can use the IMIA logo on their official documents with the text "Regional Member of IMIA".

The Affiliate and Institutional Members can use the IMIA logo only in connection with the text: "Affiliate/Institutional Member of IMIA".

Use of WHO Emblem.

The International Medical Informatics Association (IMIA) is a non governmental organisation in official relations with the World Health Organisation (WHO). Pursuant to accepted practice, IMIA may have printed on its letterhead, in a discreet manner, the words "in official relations with WHO".

Any use of the WHO emblem by IMIA is subjected to authorisation, on a case-by-case basis, by the Director-General of WHO. Authorisation to use the WHO emblem may be granted for an IMIA meeting co-sponsored by WHO, or for a WHO/IMIA joint publication.

Request for authorisation should be sent to the WHO technical division or programme concerned, which will forward the request to the Director-General through the Legal Office or the Office of Publications, as case may be.

For IMIA, the responsible official in WHO is Dr S. H. Mandil, Director-Advisor on Informatics, World Health Organisation, 1211 Geneva Switzerland.

Within IMIA all requests to use the WHO emblem or co-sponsorship must be channelled through the IMIA President.

Use of other logo's.

If a Special Interest Group/Working Group has its own logo this can be used on all their documents. The introduction of the logo must be reported to the IMIA board.
