

Second IMIA/IFMBE Working Conference on Biosignal Interpretation

September 23 - 28, 1996, Kanagawa, JAPAN

The International Federation for Medical and Biological Engineering (IFMBE) and the International Medical Informatics Association (IMIA), in collaboration with the Japan Society of Medical Electronics and Biological Engineering, will organize the Second Workshop on Biosignal Interpretation. This workshop aims to explore in the relatively new field of biosignal interpretation: model based biosignal analysis, interpretation and integration, extending existing signal processing technology for the effective utilization of biosignals in a practical environment and in a deeper understanding of biological functions. This is the second workshop in this area. The first workshop, IMIA-IFMBE Working Conference on Biosignal Interpretation, was held at Skorpung, Denmark in August, 1993. Selected presentations will be published in a recognized journal as a full paper.

In the mean time, about 78 papers have arrived, including keynote papers, oral presentations, posters and demonstrations.

Conference site:

Shonan Village Center, Hayama-machi, Kanagawa 240-01, Japan

Phone: +81-468-55-1800 FAX: +81-468-55-1816.

It is a scenic place located on a hill commanding a view of Mt. Fuji. The site is close to the ancient capital, Kamakura, and the exotic harbor city, Yokohama. Accommodations will be arranged by the executive committee.
