CONTENTS

Chapter 1

IMPORTANCE OF EDUCATION IN MEDICAL INFORMATICS

Problems in medical informatics for doctors and para medical personel 1
The patient 2
Health care personnel and medical data processing systems 3
Difficulties in introducing information processing into health care 3
Need for a well designed educational project 6
How the study was conducted : Level 1 8
Level 2 9
Level 3 9
Method of presentation 10
Summary 11

Chapter 2

THE NEEDS FOR EDUCATION IN MEDICAL COMPUTING
EVALUATION BY AN INTERNATIONAL SURVEY

Introduction 13
Respondants to questionnaire 14
Structure of questionnaire 15
Results of questionnaire
Section 1 Medical Doctors and Medical Scientists 16
1.1. The general Practitioner
1.2. Hospital Doctor
1.3. Medical Scientists
1.4. General Comments
Section 2 Nurses and Health Service Technicians 18
2.1. Nurses
2.2. Health Service technicians

Section 3 Hospital Administrators and Medical Community Administrators 19

3.1. Hospital Administrators

3.2. Medical Community Administrators

Personal comments requested 20

1. General comments
2. Comments about doctors
3. Comments about nurses
4. Comments about administrators

Discussion with some experts 25

Views of working group 25

Summary 26

Chapter 3

OBJECTIVES IN COMPUTER EDUCATION

Introduction to objectives 27

Three levels of objectives : Level 1 29

Level 2 30

Level 3 31

Specification of objectives for categories of health personnel 31

A. Objectives in Medical Data Processing Education for Doctors 32
   1. General Practitioner
   2. Hospital Doctors
   3. Medical Scientists

B. Objectives for nurses and health service technicians 34
   1. nurses
   2. health service technicians

C. Objectives for administrative personnel 35
   1. hospital administrators
   2. medical community administrator
   3. clerks and secretaties

Comment 36

Second survey 38

Summary 40

Chapter 4

CURRICULUM PLANNING AND COURSES DESIGN

Introduction 41
Level 1 43
Level 2 46
A. Basic information sciences
B. Medical and health services applications
Level 3 52
Summary 53

Chapter 5

BASIC CONCEPT OF DATA PROCESSING

Introduction 55
What is information processing 57
Organization of information 58
a. data representation
b. file : 1. dynamic file
2. reference file
c. data bank
System analysis 61
a. system analysis description
b. algorithm
c. flow chart
Basic description of a digital computer 63
a a computer is a stored program machine
b. parts of a digital computer and their uses
c. different ways of scheduling a computer
Languages 67
a assembly languages
b. external languages
"House-keeping" software 69
Summary 70

Chapter 6

TEACHING METHODS

Introduction 71
Amphitheater lectures 73
Practical work 74
Books 75
Programmed instruction 76
Computer assisted instruction
1. computerized programmed instruction
2. simulation techniques
Audio-visual aids 77
Group techniques 79
Multidisciplinary approach 81
Summary 83

Chapter 7

EVALUATION OF EFFECTIVE TRAINING SYSTEMS

Introduction 85
Importance of objective methods of evaluation 86
1. Evaluation of the student
2. Evaluation of course objectives
3. Evaluation of course content
4. Evaluation of teaching methods
5. The use of computers on evaluation techniques
Evaluation on the three different levels : Level 1 89
Level 2 90
Level 3 91
Summary 92

Summary of the booklet 93

Conclusions. 94

Appendix 1 95
First Survey

Appendix 2 117
Second Suvey (1974)

Appendix 3 123
Faculté Pitié-Salpêtrière (Paris 6)

Appendix 4 131
Deutsche Gesellshaft für Medizinishe dokumentation und Statistik

Appendix 5 133
The Massachussets General Hospital (MGH)

Appendix 6 135
Université Catholique de Louvain

Appendix 7 137
National Institute of Health (Maryland)

Appendix 8 139
King's College Hospital Medical School (London)

Appendix 9 145
State University Gent (Belgium)

Appendix 10 149
Section Médicale, Ministère de l'Education Nationale (France)

Appendix 11 151
Program proposed for Level 3 (J. Roukens, Netherlands)

Appendix 12 155
University of California San Francisco Medical Center

Members of the Working Group :

- J. ANDERSON, secretary
- D. DOITSHINOV
- C. GIL GAYARRE
- F. GREMY, chairman
- J. HEITE
- T. HUSAK, former chairman
- J.C. PAGES
- J. ROUKENS
- J. Van EGMOND
